

NAVCOMPACT™

Part 1 – Identification of the substance and of the company/undertaking

Identification on the label /Trade name: NAVCOMPACT™
 Supplier(Manufacturer): New Age Veneers Pty Ltd
 Address: Unit 11, 22-24 Beaumont Road, Mount Kuring-Gai, NSW 2080
 Telephone: 02 9457 9622
 Email: reception@newageveneers.com.au

Part 2 – Hazards Identification

Classification of the substance or mixture:		
Ghs Label Elements	Serious eye damage/eye irritation: Skin sensibility: Aquatic Chronic:	Classification 2A Classification 1 Classification 3
Hazard Pictograms		
Signal Word(S): Hazard Description	Warning. H319 Causes serious eye irritation H317 May cause skin allergic reaction H412 Harmful to aquatic life with long lasting effects	
Preventive Instructions Preventive Measures	P261 Avoid breathing dust/fume/gas/mist/vapor/spray. P264 Wash thoroughly after operation P272 Contaminated work clothes must not be taken out of the workplace. P273 Avoid release to the environment. P280 Wear eye protection/face protection/ protective gloves.	
Incident Response	P302+P352 If on skin: wash thoroughly with water P305 + P351 + P338 If in eyes: Rinse cautiously with water for several minutes. If you wear contact lenses and can be easily taken out, take out the contact lenses. Continue to rinse. P321 specific treatment (see this label) P333+P313 If skin irritation or rash occurs: Get medical advice/attention. P337 + P313 If eye irritation persists: Get medical advice/attention. P362+P364 Take off the contaminated clothing and wash it before reuse.	
Waste disposal	P501 Dispose of contents/container in accordance with local/regional/national/international regulations.	

Part 3 – Composition/information on ingredients

Substance/Mixture: Mixture		
Chemical	CAS. NO	CONTENT
Melamine Resin	9003-08-1	8%
Decorative Paper	-	8%
Phenolic Resin	9003-35-4	42%
Kraft Paper	-	42%

NAVCOMPACT™

Part 4 –First aid measures

General measures	If you feel unwell in case of an accident, please contact your doctor. If symptoms persist, or if in doubt, follow the doctor's instructions.
In case of skin contact	Remove contaminated clothing and shoes immediately. Rinse immediately with plenty of water and soap. Get medical attention immediately.
In case of eyes contact	If in eyes: Rinse carefully with water for at least 15 minutes, remove contact lenses, and continue to rinse if available and easy to do. Get medical attention immediately.
In case of inhalation	Remove to fresh air. Perform CPR if there is no pulse or respiration. Consult a physician.
In case of ingestion	After accidental ingestion, please keep calm and accept the doctor's diagnosis as soon as possible.
Most important acute and delayed symptoms and effects	No information.
Signs requiring immediate medical attention and special treatment	Symptomatic treatment

After the above measures, contact the doctor and receive the doctor's treatment as needed.

Part 5 – Fire-Fighting measures

Suitable fire extinguishers	Water spray,Carbon dioxide (CO2),Dry chemicals,Chemical foam.
Special hazards caused by chemicals	In case of fire, it will decompose to produce harmful substances.
Specific methods	Firefighters shall wear air breathing apparatus, full body fire-fighting clothes and put out the fire in the upwind direction.

Part 6 –Accidental release measures.

Personal protective measures, protective equipment, emergency measures	Remove all sources of ignition. Avoid dust formation. Refer to Section 8 for personal protection.
Environmental Precautions	Avoid releasing into the environment. Please inform the local government if you can't handle the recycling.
Containment, removal methods and disposal materials used for leaking chemicals	Sweep, shovel, and place in a suitable container for disposal.
Refer to other sections	For information on safe operation, refer to section 7. For information on personal protective equipment, see Section 8. See section 13 for disposal information.

Part 7 – Handling and storage

Handling	Avoid dust formation. Avoid contact with skin, eyes and clothing. Avoid ingestion and inhalation. Personal protective equipment.
Storage	Store in a cool, dry and well ventilated warehouse. Keep away from heat and fire sources.

Part 8 – Exposure control/personal protection

Occupational exposure limits	No information.
Engineering measures	Provide effective eye wash and safe bathing. Ensure adequate ventilation.
Individual protection measures, such as personal protective equipment;	
Respiratory Protection	When the concentration in the air exceeds the standard, a gas mask must be worn. Use NIOSH / MSHA or European standard EN136 approved respirator.
Skin & body protection	Choose physical protection measures according to the type, concentration and quantity of hazardous substances and specific workplace. The type of protective equipment must be selected according to the concentration and quantity of hazardous substances in the specific workplace.
Eye protection	Protect eyes. Please use equipment tested and approved by official standards such as NIOSH (USA) or en 166 (EU) for eye protection
Hand protection	Protective gloves (natural rubber, EN 374).
Hygienic protection	Pay attention to personal hygiene. Wash hands after work.

Part 9 – Physical and chemical properties

Appearance	Solid
Colour	Brown
Odor	N/A
Odor threshold	N/A
Molecular weight	N/A
Molecular formula	N/A
Molar mass	N/A
PH	N/A
Specific gravity	N/A
Melting point/range (°C)	N/A

Refractive index	N/A
Boiling point (°C)	N/A
Solidification point	N/A
Flash point	N/A
Auto-ignition temp	N/A
Ignition temperature	N/A
Ignition point	N/A
Flammability	N/A
Upper/lower flammability or explosion limit:	N/A

Decomposition	N/A
Relative density (Water=1) : Volume density:	N/A
Solubility	N/A
Vapor pressure	N/A
Vapor density	N/A
Volatilization rate	N/A
Viscosity	N/A
Solid content	N/A

Part 10 - Stability and reactivity

Stability	Material is stable under normal conditions.
Hazardous reactions	The product is stable when stored and used under normal ambient temperature.
Conditions to avoid	Incompatibility.
Incompatibility	Strong oxidants
Harmful decomposition products:	Carbon oxide, sodium oxide, hydrogen chloride gas, calcium Oxide
Possibility of hazardous reactions:	In case of fire, it will decompose to produce harmful substances.

Part 11 - Toxicological information

Information on toxicological effects:	
Acute toxicity	No data available.
Skin irritation or corrosion	No data available.
Eye irritation or corrosion	Phenolic resin: Eyes-rabbit Result: corrosive Remarks: (ECHA)
Skin/ Respiratory sensitization:	No data available.
Germ cell mutagenicity	No data available.
Carcinogenicity	No data available.
Reproductive toxicity	No data available.
Specific target organ system toxicity -single exposure:	No data available.
Specific target organ system toxicity -repeated exposure:	No data available.
Aspiration hazard	No data available.

Part 12 – Ecological information

Acute toxicity	No data available.
Persistence and degradability	No data available.
Mobility in soil	No data available.
PBT and vPvB assessment results:	
PBT	No data available.
vPvB	No data available.
Other adverse effects	No data available.

Part 13 – Disposal considerations

Waste treatment methods	Please refer to the requirements of relevant laws and regulations of your country or region before disposal.
Packaging	Please refer to the requirements of relevant laws and regulations of your country or region before disposal.

Part 14 – Transport information

UN Number	Non hazardous chemicals.
ADR, IMDG, IATA UN proper shipping name:	Non hazardous chemicals.
Transport hazard class(es):ADR, IMDG, IATA	Non hazardous chemicals.
Packing group ADR, IMDG, IATA	Non hazardous chemicals.
Secondary risk	Non hazardous chemicals.
Environmental hazard	No information
Transportation Notes:	No information

Part 15 – Regulation information

GHS Labelling Elements	Classification and labelling are carried out according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS).
Chemical safety assessment	For this mixture, no chemical safety assessment has been carried out.

Part 16 –Other information

MSDS Tabulation Date:19th March 2021

Abbreviations and acronyms:

RID: Regulations Concerning the International Transport of Dangerous Goods by Rail

IATA-DGR: Dangerous Goods Regulations by the "International Air Transport Association" (IATA)

ICAO: International Civil Aviation Organization

ICAO-TI: Technical Instructions by the "International Civil Aviation Organization" (ICAO)

ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road

IMDG: International Maritime Code for Dangerous Goods

IATA: International Air Transport Association

GHS: Globally Harmonized System of Classification and Labelling of Chemicals

EINECS: European Inventory of Existing Commercial Chemical Substances

CAS: Chemical Abstracts Service (division of the American Chemical Society)

LC50: Lethal concentration, 50 percent

LD50: Lethal dose, 50 percent

vPvB: very Persistent and very Bioaccumulative

ACGIH: American Conference of Governmental Industrial Hygienists (USA)

OSHA: Occupational Safety and Health Administration (USA)

NTP: National Toxicology Program (USA)

IARC: International Agency for Research on Cancer

EPA: Environmental Protection Agency (USA)

This MSDS was prepared sincerely on the basis of the information we could obtained, however, any warranty shall not be given regarding the data contained and the assessment of hazards and toxicity. Prior to use, please investigate not only the hazards and toxicity information but also the laws and regulations of the organization, area and country where the products are to be used, which shall be given the first priority. Products are supposed to be used promptly after purchase in consideration of safety. Some new information or amendments may be added afterwards. If the products are to be used far behind the expected time of use or you have any questions, please feel free to contact us. The stated cautions are for normal handling only. In case of special handling, sufficient care should be taken, in addition to the safety measures suitable for the situation. All chemical products should be treated with the recognition of "having unknown hazards and toxicity", which differ greatly depending on the conditions and handling when in use and/or the conditions and duration of storage. The products must be handled only by those who are familiar with specialized knowledge and have experience or under the guidance of those specialists throughout use from opening to storage and disposal. Safe usage conditions shall be set up on each user's own responsibility.
